

29 April 2024

## QUARTERLY ACTIVITIES REPORT to 31 March 2024

**Blue Energy Limited** (ASX: BLU, ‘Blue Energy’, ‘Blue’ or ‘the Company’) is pleased to report on activities during the quarter ended 31 March 2024 across its acreage in Queensland and the Northern Territory, in which the Company’s key gas and oil projects are located.

### **KEY HIGHLIGHTS**

- **Sapphire Pilot Status:** As reported last quarter, the Sapphire 5 lateral pilot wells have been reinstated to production testing and the aggregate gas flow rate for the Sapphire pilot has increased to 0.12 TJ/day. Water rate was also seen to increase as the Sapphire 5 pilot wells re-entered the de-pressuring phase (de-watering).
- Blue notes that Queensland Pacific Metals Ltd (ASX:QPM) (developer of the TECH nickel refinery project in Townsville and owner of the Moranbah Gas Project) has made a strategic decision to focus on growing its Moranbah gas production assets including gas supply from third parties. Accordingly, QPM has confirmed that they intend taking gas that Blue makes available for delivery to the Moranbah Gas Project in line with the existing non-binding MOU executed in 2023.
- Blue is still awaiting the outcome of the Queensland Government’s Frontier Gas Exploration \$21 million Grants Program. The program was launched for successful applicants to conduct new exploration drilling in the Bowen and Galilee Basins, where the Qld Government clearly sees potential to identify new gas supply for the State and the east coast Australian Gas Market.
- Blue has acquired the Geoscience Australia (GA) regional raw 2D seismic data shot over Blue’s EP 200, and 207 in the Wiso Basin area of the Northern Territory (the Greater McArthur Basin). Blue is currently independently processing the section of the data relevant to the prospective section in these permit areas. Inspection of preliminary GA sections indicates a similar sequence sedimentary reflectors to those emanating from EP’s 168 & 198 to the north of Blues acreage and within the Beetaloo sub basin.
- Blue Energy has continued to provide information as required by the schedule determined the Land Court of Queensland in the appeal by the Environmental Defenders Office (EDO) against the Department of Environment and Science. Blue is at the stage of assessing a range expert witnesses for the specific areas for which the EDO has lodged the Appeal (primarily Greenhouse Gas Emissions for the project and the impact of the project on the Human Rights of the population of the planet).

## **Sapphire pilot well production test program preparing resumed following maintenance.**

Blue has re-instated pilot production testing of the Sapphire 5 wells following a prolonged period of pressure build up and some mechanical maintenance. As a consequence, the aggregate gas flow rate from the Sapphire pilot ( Sapphire 5 & Sapphire 6 well sets) has climbed to 0.12 Tj/.day, and with a commensurate increase in water production rate, as the Sapphire 5 wells re-enter the dewatering phase as the water levels are brought down toward the upper coal intersection levels in Sapphire 5V.

## **Queensland Government Frontier Gas Exploration \$21 million Grants Program**

The Queensland Government has not yet announced the successful applicants for the funding grants that it has offered. The Qld Government’s Frontier Gas Exploration Grants Program is providing \$21.045 million in funding through the Queensland Department of Resources to support on-ground gas exploration activities in the Bowen and Galilee Basins. Blue’s ATP 814 area in the North Bowen Basin meets the eligibility criteria of the grants program and accordingly Blue has lodged applications under this program for new drilling in the ATP 814 area. It is expected that successful applications will be notified during the June quarter.

## **Blue acquires and is processing Geoscience Australia (recently acquired) regional 2D seismic data in the Wiso Basin area of the Northern Territory and within Blue’s tenement areas.**

Blue has now acquired the 2D regional seismic data which was recently acquired by Geoscience Australia (GA) in the Wiso Basin (overlays the Birrindudu Basin), and which overlaps Blue Energy’s tenements in several locations (specifically EP 200 and EP 207). This seismic acquisition program is part of a national “Exploring for the Future” seismic acquisition program.

The preliminary Post stack Time migrated data was presented by GA at the AGES geological workshop in April 2024. The initial assessment of the data as relevant to Blue’s acreage in the Wiso Basin is that the GA data confirms the continuation of the stratigraphic seismic character evident from EP’s 168 and 198 to the north and north east of Blue’s acreage which is contiguous with elements of Beetaloo sub-basin and McArthur Basin.

The GA data is deep seismic data with record lengths of up to 26 seconds of seismic time. Blue is currently independently processing the GA data to focus on the zones of prospectivity for oil and gas entrapment (top 6 seconds of the GA seismic record). Other work conducted by GA as part of the regional assessment include correlation of recorded oil shows in mineral bores recorded in the Birrindudu (Wiso) Basin.

## **Environmental Authority ATP 814**

As referenced in the December 2023 Quarterly, Blue continues to execute its defence of the grant of Environmental Authorities (EA) by the Queensland Department of Environment and Science (DES) for its proposed activities in ATP 814.

The specific issues of the Appeal are at this stage still being agreed to by the parties, with the provision of better and further particulars relating to the Appeal. However, Blue is currently canvassing suitable expert witnesses relating to specific flora fauna and ground water matters raised in the Appeal, together with expert witnesses to support Blue’s granted EA with respect to Green House Gas emission (GHG’s) that are probable from the Sapphire Project, together with experts in the field of Human Rights impacts and intergenerational impacts of gas production from the project as it impacts the need to maintain standards of living, employment opportunities,

Cultural heritage discovery, Traditional Owner financial benefits and continuing domestic manufacturing industries and back up of renewable energy generation through use of gas fired electricity generation to underpin the transition to a lower GHG emission economy.

**Background of the Appeal:** Following the grant of the EA by DES, the Environmental Advocacy in Central Queensland Inc (EACQI) lodged an appeal in the Qld Land Court regarding the decision by the Queensland Government (DES) to award the EA to Blue Energy. The Appeal by the EACQI is being conducted by the Environmental Defenders Office (EDO) on behalf of EACQI. The EDO receives part funding for its activities from the Queensland Government.

Notwithstanding that proper process and decision making was undertaken by DES and that extensive supporting materials that Blue submitted for that process were sufficient to grant a standard condition EA, Blue has been joined as a party to the appeal by the EDO as Blue is an interested party being the beneficiary of the EA granted to it.

## ACTIVITY IN PROVEN BASINS

### **Bowen Basin, Queensland: ATP 814 (Blue Energy 100% and Operator)**

Blue has re-instated pilot production testing of the Sapphire 5 wells following a prolonged period of pressure build up and some mechanical maintenance. As a consequence, the aggregate gas flow rate from the Sapphire pilot has climbed to 0.12 Tj/.day, and with a commensurate increase in water production rate, as the Sapphire 5 wells re-enter the dewatering phase as the water levels are brought down toward the upper coal intersection levels in Sapphire 5V (see Figure 2)

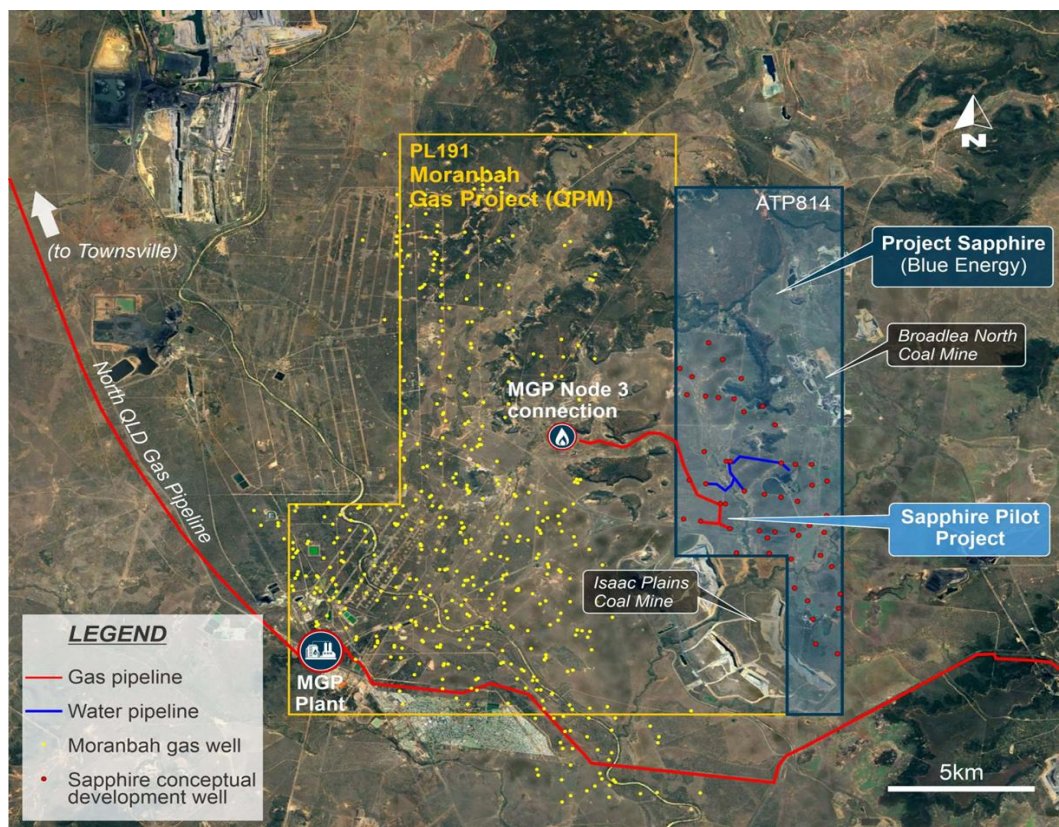

Figure 1: Sapphire block of ATP 814 in relation to the Moranbah Gas Project and the related gas producing wells. Also shown is the proposed pipeline connection from Sapphire to the MGP Node 3 connection and initial proposed Sapphire development.

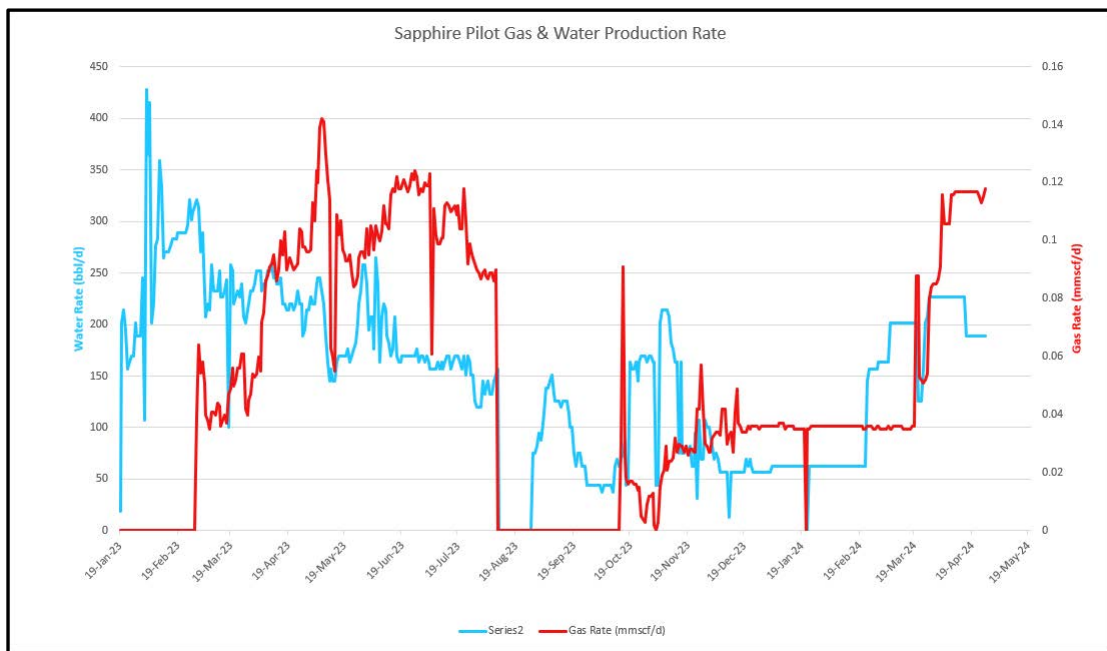

Figure 2: Sapphire Pilot production aggregate rates for gas and water.

The Sapphire Pilot is situated within the PL 1034 production licence application area, which is located immediately adjacent to the Moranbah Gas Project (MGP) – See Figure 1. The MGP is a producing gas field which was recently acquired by Queensland Pacific Minerals Energy (QPME). Blue Energy has an existing non-binding MoU to supply gas to the proposed QPM (parent entity to QPME) Nickel refinery in Townsville. With the acquisition of the MGP by QPME, there is alignment between QPME and Blue Energy for the Company to utilise MGP infrastructure to fulfil the supply agreement to the proposed QPM Townsville plant. Reflecting this alignment, Blue and QPME executed a non-binding MoU to supply pilot gas to the MGP from the Sapphire Pilot via a proposed pipeline from Sapphire Pilot location to the Node 3 compressor station within the Moranbah Gas field (Figures 1).

As earlier advised Blue was granted a Site-Specific Environmental Authority (EA) for the PL 1034 application by the Queensland Department of Environment and Science (DES). This EA will cover the proposed development of the PL 1034 gas resource and is a requirement for grant of the Production Licence. As previously advised to the market and described in the section above, The Environmental Defender’s Office has lodged an appeal with the Land Court, against the decision by the DES to award the EA.

Blue is in the concluding stages of negotiating a Native Title Agreement with the Traditional Owners in the Sapphire Block area. Once executed, this agreement will allow the State to award the Petroleum Lease (PL 1034) .

**Surat Basin, Queensland: ATP 854 (Blue Energy 100% and Operator)**

As noted in previous Quarterly reports Blue has lodged PCA applications over this permit area to allow this tenure to progress toward assessing and developing the potential economic gas resources identified by Blue’s exploration drilling work in the permit to date. Blue continues to work with the Queensland Government to secure grant of these PCAs.

Blue has 398 PJ+ of Contingent Resources (recoverable gas) in ATP 854 as assessed by NSAI. The gas resource is located near the heart of the CSG–LNG Surat Basin gas supply precinct and has gas pipeline infrastructure linking Wallumbilla to Gladstone running directly through the permit (Figure 3 below).

<sup>†</sup> see Listing Rule 5.42 Disclosure at page 9.

Source: Blue Energy.

## ACTIVITY IN EMERGING BASINS

### Greater McArthur Basin, Northern Territory:

(Various permits and equity levels, Blue Energy Operator: see Figure 5)

As has been previously reported, Blue has been advised by the Department of Environment, Parks and Water Security that it has approved the EMP for the acquisition of 2D regional seismic in EPs 205, 207. The EMP incorporated the results of the on ground survey work undertaken by Blue Energy in 2022 which looked at the flora and fauna aspects of the survey line locations and access points of the proposed seismic line locations.

As advised in the December 2023 quarterly report, Geoscience Australia (GA) has independently acquired deep 2D regional scale seismic data in Wiso Basin (Birrindudu Basin) – see Figure 4 below. A good portion of this seismic data overlaps Blue Energy’s tenements (specifically EP 200 and 207). This seismic acquisition program is part of a national “Exploring for the Future” acquisition program. The data was acquired by GA in September 2023 and Blue has viewed the preliminary processed product from the full seismic data (down to 26 seconds). Blue has obtained this raw data and is now independently processing this data to specifically evaluate the structural aspects and potential prospectivity of the shallower Proterozoic section of interest in EP 200 and EP 207. See Figure 3

The preliminary Post Stack Time Migrated data was presented by GA at the AGES geological workshop in Alice Springs in April 2024. The initial assessment of the data, as relevant to Blue’s acreage in the Wiso Basin is that the GA data confirms the continuation of the stratigraphic seismic character evident in EP’s 168 and 198 to the north and north east of Blue’s acreage which is contiguous with elements of Beetaloo sub-basin and McArthur Basin. This is encouraging for the prospectivity of Blues acreage in the Wiso/Birrindudu and Greater McArthur Basins. Other work conducted by GA as part of the regional assessment include correlation of recorded oil shows in mineral bores recorded in the Birrindudu (Wiso/Greater McArthur) Basin

Blue has also been granted a Suspension and Extension of the EP 200, 205 and 207 tenures and their work associated programs to reflect the delays in the EMP approval process for the 2D seismic acquisition proposed for these tenures. These extensions will be valid until February 2025.

Figure 5: The Blue Energy exploration asset portfolio Source: Blue Energy.

## June Quarter Exploration Expenditure Summary

During the Quarter, and as noted in Section 2.1 (d) of the Appendix 5B Form (appended to this Quarterly Activity report), the company expended \$0.928 million on exploration and evaluation activities.

This total is comprised of general exploration expenditure (Tenement access, Tenure administration and Tenure management) together with Sapphire Pilot well activities (equipment hire, fuel, consumables, labour hire), resource assessment costs plus labour and overhead costs charged to the Sapphire Project

## CORPORATE

### Cash position

Cash on hand (at 31 March 2024) was A\$5.39 million. The Company has zero debt position.

Blue's accompanying Appendix 5B (Quarterly Cashflow Report) includes an amount in Item 6.1 which constitutes Non-executive Directors' fees for the quarter. The aggregate amount of payments to related parties and their associates for the June quarter (shown in Items 6.1 and 6.2 of the attached Quarterly Cashflow Report) relates to cash fees paid to all Directors (including salaries paid to the Executive Chairman and Managing Director).

**Table 1** Blue Energy gas reserves and resources (net) as at 31 March 2043<sup>+</sup>

**\*Listing Rule 5.42 Disclosure**

The estimates of Reserves and Contingent Resources noted throughout this Quarterly Activities Report have been provided by Mr John Hattner of Netherland, Sewell and Associates Inc (NSAI) and were originally reported in the Company's market announcements of 25 January 2012, 26 February 2013, 19 March 2013, 8 December 2015, 28 February 2019, 22 January 2022, 14 July 2022, 11 July 2023 and 11 October 2023. NSAI independently regularly reviews the Company's Reserves and Contingent Resources.

Mr Hattner is a full-time employee of NSAI, has over 30 years of industry experience and 20 years of experience in reserve estimation, is a licensed geologist and a member of the Society of Petroleum Engineers (SPE), and has consented to the use of the information presented herein. The estimates in the reports by Mr Hattner have been prepared in accordance with the definitions and guidelines set forth in the 2018 Petroleum and Resource Management System (PRMS) approved by the SPE, utilising a deterministic methodology.

Blue Energy confirms that it is not aware of any new information or data that materially affects the information included in any of the announcements relating to ATP 814 or 854 referred to in this report and that all of the material assumptions and technical parameters underpinning the estimates in this Quarterly Activities Report continue to apply and have not materially changed.

<sup>++</sup> Listing Rule 5.28.2: The estimated quantities of petroleum that may potentially be recovered by the application of a future development project(s) relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration appraisal and evaluation is required to determine the existence of a significant quantity of potentially moveable hydrocarbons.

7.3	-	-
7.4	<b>101</b>	<b>101</b>
7.5	<b>Unused financing facilities available at quarter end</b>	
		0
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.	
	Loan facilities represent a \$0.1 million unsecured working capital loan with an interest rate of 3.95% per annum and a final repayment date of 29 August 2024.	

<b>8. Estimated cash available for future operating activities</b>	<b>\$A'000</b>
8.1	(410)
8.2	(928)
8.3	<b>(1,338)</b>
8.4	5,386
8.5	-
8.6	<b>5,386</b>
8.7	<b>4.03</b>
<i>Note: if the entity has reported positive relevant outgoings (i.e., a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?
	Answer: <b>N/a</b>
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?
	Answer: <b>N/a</b>
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?
	Answer: <b>N/a</b>
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

## Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: **29 April 2024**

Authorised by: **The Board of Blue Energy Limited**  
(Name of body or officer authorising release – see note 4)

## Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
